

SULBY

Smart dry electric towel rail with WiFi control

Overview

Sulby is a dry thermal electric towel rail in high-grade stainless steel. There is no fluid to fill, bleed or leak, so it is light to lift, quick to fit and heats up faster than a traditional fluid filled rail.

A touch control panel on the rail and the SolAire WiFi app give you a built-in thermostat, boost timer and 7-day schedule, so towels are warm and dry when you need them and the rail is off when you do not.
